

Bertie the Banana

I need a hot climate to help me Bloom
And a very high tree gives me room.
I start off small and my shape is straight
and slowly curve which is great.

70 days have now passed, and I am now fully grown
It is time to be picked and I won't be alone
As I make my way to your fruit plate
I will stay here for you and patiently wait

I need to be yellow before I am ripe
But don't forget to peel me before you have a bite
I am Bertie the Banana, to eat after your food
I am a healthy fruit and a real cool dude.
